

SALES CONVERSATION AI COMMAND CENTER

Autonomous sales conversion across the enterprise, powered by 12 governed AI Employees that detect intent, score leads, engage visitors, and hand qualified deals to reps, Human-in-Command throughout.

THE COST OF MISSED CONVERSIONS

For Sales Leaders, Revenue Teams, and Digital Channel Managers, sales conversion operations face three structural constraints:

Blind Visitor Intent

Millions of visitors show purchase intent: browsing products, starting quotes, comparing plans but no system detects or acts on these signals in real time.

Slow, Manual Follow-Up

Sales reps receive cold lead lists with no context, no scoring, and no recommended actions. By the time outreach happens, the buying moment is gone.

Zero Cross-Sell Intelligence

Visitors follow single-product journeys. No system identifies complementary products, optimal timing, or the right channel to re-engage abandoned sessions.

One Trusted Access Point

The Sales Conversion AI Command Center connects revenue teams to:

 CRM & Customer Data Platforms

 Website & Product Analytics

 Messaging Channels

 Quote & Pricing Engines

 Compliance & Consent Systems

HOW CONVERSION SCALES WITHOUT LOSING CONTROL

Detect

Identifies high-intent visitors via behavioral signals, time on page, exit intent, return visits, quote abandonment and initiates proactive engagement.

Score

Evaluates every lead on three dimensions Intent, Urgency, and Fit producing a composite Hot / Warm / Cool classification that updates in real time.

Engage

Activates multi-channel follow-up WhatsApp, In App Push, Browser Resume, SMS/Email governed by configurable Auto Policies with consent enforcement.

Convert

Routes qualified leads to human reps with enriched context briefs, recommended talking points, and full journey history, so reps close, not chase.

From Insights to Revenue

Beyond scoring leads, the Sales Conversion AI Command Center drives downstream outcomes where approved:

Proactive
Engagement

Lead
Routing

Cross-Sell
Activation

OPERATING FLOW (SALES CONVERSION EXECUTION)

TO KNOW MORE

BUILT-IN SECURITY, GOVERNANCE & COMPLIANCE

Designed for regulated environments:

- Role-based access aligned to existing permissions (Keycloak SSO / RBAC)
- AI Employees act only on organization-approved data sources, governed by Auto Policies
- Privacy-first: GDPR / LGPD / CCPA consent gating, no engagement without explicit opt-in
- Full traceability of every AI Employee action, lead interaction, and Auto Policy decision
- Complete audit trail with PII masking across the stack

Always Human-in-Command
