**Briefing**

## Compliance Dashboard for Leadership

**Tenders Processed:**
By department, value, category

**Compliance Score:**
% adherence to GFR/CVC rules

**Exception Rate:**
Deviations requiring human override

**SLA Performance:**
Processing time vs. benchmarks

**Vendor Concentration:**
Risk of over-dependence on single vendors

**Pending Approvals:**
Bottleneck identification

| QUANTIFIED IMPACT | Tender Processing Time | Manual Effort per Tender | Compliance Accuracy | Audit Readiness | Cost per Tender |
|---|---|---|---|---|---|
| WITH MANUAL EFFORT | 15 - 20 Days | 40+ Hours | 85 - 90% | 2-3 Weeks Prep | ₹15,000 - 20,000 |
| WITH TENDER AI COMMAND CENTER | 3 - 5 Days | 4 - 6 Hours | 99.8% | Always Audit-Ready | ₹3,000 - 5,000 |

# BUILT FOR CAG. READY FOR VIGILANCE.

Audit-ready, vigilance-proof operations designed for 100% transparency.

**1** ## Policy Enforcement Layer

Procurement rules (GFR 2017, CVC) are encoded in natural language.
Agents cannot bypass these rules, they are the "law of the system".

**2** ## Complete Audit Trail

Every decision rationale is captured automatically.
Generate a comprehensive "Audit Package" with a single click.

**3** ## Segregation of Duties

Role-based access (Indenter → Procurement → Finance → Approver)
Maker-checker workflows enforced by system

# SECURE, FLEXIBLE, AND SCALABLE

Built to align with PSU data residency, security, and IT policies.

## Integrations

| Government e-Marketplace (GeM) | State eProcurement Portals | Central Public Procurement Porta | ERP Systems (SAP, Oracle, Tally | Document Management System |
|---|---|---|---|---|

## About Supervity

Supervity AI is next generation self-driving apps software company that enables enterprises to deploy its proprietary multi-agentic AI Employees across core business functions such as Finance, HR, Procurement, Sales, Customer Service, Shared Services and IT. It helps organizations eliminate manual operations while delivering measurable efficiency with human-in-command control and governance.

# Eliminate Manual Friction.
# Enforce Procedural Excellence.

## Current Reality

| Current Reality | Impact |
|---|---|

**Current Reality:**

Manual tender document review across multiple portals (GeM, eProcurement, CPP) → 60-70% of officer time spent on repetitive tasks

Paper-based evaluation with inconsistent scoring → Delayed procurement cycles by 30-45 days

Compliance checks done manually at each stage → Audit observations and vigilance risks

No single view of tender lifecycle → Lack of real-time visibility for leadership

Vendor document verification is labor-intensive → Onboarding delays affecting project timelines

## Your AI Workforce for Governed Procurement

### Tender Document Processor

Extracts requirements, eligibility, and BOQ items from NIT/RFP documents instantly.

### Bidder Qualification Analyst

Validates PQ criteria, experience, turnover, and EMD certifications with 99.8% precision.

### Technical Evaluation Specialist

Scores technical bids against defined parameters with total bias-free consistency.

### Commercial Bid Analyzer

Compares prices, identifies L1, and flags abnormally low quotes for committee review.

### Compliance Monitor

A digital watchdog ensuring adherence to GFR 2017, GeM guidelines, and CVC circulars.

### Contract Lifecycle Manager

Tracks milestones, LD calculations, and performance guarantees post-award.

# Enterprise-Grade AI Architecture for Mission-Critical Procurement

## Intelligent Orchestration: Beyond Basic Automation.

Tender Command Center deploys intelligent agents that understand context, apply policies dynamically, and learn from your organization's decisions.

## The 7-Layer Orchestration Model

**Tender Command Center**
( Human-AI Collaboration Interface )

### Orchestrator Agent

| Policy Manager | Access Manager | Tools Manager | Data & Privacy Manager | Operations Manager | Insights Manager | Memory Manager |

### Operator Agent

| Document Extractor | Eligibility Check | Price Analyzer | Compliance Validator | Report Generator |

## Integration Architecture

### Government Portals
- GeM
- eProcurement
- CPP Portal
- NIC Services

### Tender Command Center
- API Gateway
- MCP Connectors
- SSO (Keycloak)
- Audit Logs

### Enterprise Systems
- SAP/Oracle
- DMS
- Email/SMS
- e-Office
