

ABOUT SUPERVITY

AI EMPLOYEES FOR SELF-DRIVING OPERATIONS.

Founded in 2017 and headquartered in Reston, Virginia, Supervity is the AI Employee company. Its service-as-software platform deploys Autos across enterprise and public-sector operations, while humans stay in command through policies, approvals, and complete audit trails.

Where Autos run

AI does the work. Humans govern.

**FINANCE**

Runs accounts payable, reconciliation, and reporting from intake through resolution.

**PROCUREMENT**

Runs vendor onboarding, invoice matching, and price-variance enforcement.

**ITSM**

Handles service requests, access provisioning, and ticket resolution within policy.

**HR**

Runs employee onboarding, case management, and support workflows.

**CUSTOMER SUPPORT**

Handles inbound queries, ticket triage, and resolution across chat, email, and voice.

**GOVERNMENT**

Processes permit and public-service applications on sovereign infrastructure.

Governance is part of every Auto.

Humans define the boundaries. Autos execute within them, with every action visible and reviewable.

01**AUTO POLICIES**

Plain-language rules define authority.

02**AUTO MANAGER CONSOLE**

A role-based interface where humans govern, monitor, and audit every AI Employee's work.

03**COMPLETE AUDIT TRAILS**

Every action is traceable, reviewable, and reportable.

04**AUTO WORKBENCH**

Humans resolve exceptions, and the Auto learns from each resolution.

05**SOVEREIGN BY DEFAULT**

Autos can run in the customer's cloud using the customer's own LLM contracts.

Built for enterprise trust

Supervity AI Employees are HIPAA, SOC2TYPE2, ISO27001, and FedGov* Compliant, integrate seamlessly and can be deployed in weeks for an organization.
